

TechFocal WMS - DEMO READY!!

TechFocal WMS – Demo Version Ready

Hello,

The **TechFocal Workshop Management System (WMS) Demo** is now ready for review and testing.

TechFocal WMS – System Demo

[TechFocal WMS Demo](#)

On the login page, you will find **Quick Demo Sign-ins** for the available user roles. Simply click on the required role, and the demo credentials will automatically be filled in. Then click **Sign Into** access the system.

You can use the different demo accounts to explore the system according to each user's role and permissions.

TechFocal Website – Demo

[TechFocal Website Demo](#)

Important : The website is currently running in **Maintenance / Preview Mode**. When you open the website, it will ask for an **Access Code**.

Website Access Code: `TF-PREVIEW-YZ988PIH`

Please enter this code to access and review the website.

Recommended Testing

For the **TechFocal WMS**, I recommend reviewing it primarily on a **desktop/laptop**, as the management system is designed for desktop-based business operations.

You can also open it in **mobile view/responsive mode** to check how the interface adapts to smaller screens.

For the **TechFocal Website**, please review it on **both desktop and mobile**, as the website is designed to be responsive across different screen sizes.

Demo Review

Please feel free to explore the system using the different demo accounts and review:

- Overall workflow
- Modules and features
- User roles and permissions
- Dashboard
- User experience
- Website design
- Mobile responsiveness
- Business requirements
- Any required changes or improvements

This is currently the **Demo Version**. After the review and feedback stage, the system will continue toward the **production-grade implementation**, including the remaining integrations, refinements, testing, optimization, and production deployment.

Please share any feedback, changes, or additional requirements you would like to see incorporated.

Thank you.
